

Free film screening at Bradbury Science Museum September 7

September 1, 2012

There will be a special screening of the film “The Biggest Story Problem: Why America’s Students are Failing at Math” at the Lab’s Bradbury Science Museum on Friday, September 7, at 5:30 p.m. The film, which was produced in New Mexico, investigates the middle-school math crisis in the United States and offers possible solutions to advancing our children’s math education.

No reservation is required, but seating is limited

For more information on the film, go to <https://www.thebiggeststoryproblem.com/>.

Los Alamos National Security, LLC’s Venture Acceleration Fund helped the Taos-based Imagine Education company with its business-development plan that, in turn, led to the Gates Foundation grant to produce this film.
